Availability: immediate part-time · full-time from January 2027

PROFILE

Computer Engineering student focused on backend development with Java (Spring Boot) and Python. I take my projects from start to finish, always with tests, continuous integration and documentation. I am especially interested in security and electronic signatures, and I pick up new technologies quickly. Looking for a team where I can contribute and grow, in Seville or remote.

EDUCATION

BSc in Information Systems Engineering · Pablo de Olavide University, Seville · 2022 – 2027 (in progress)

Relevant coursework: Security, Distributed Systems, Software Engineering, Software Quality, Database Architecture, Business Process Management

PROJECT EXPERIENCE

Task Manager API · Spring Boot REST API

Personal project · Oct 2026 · Repository

Java 17, Spring Boot 3, Spring Security, JWT, Spring Data JPA, Hibernate, PostgreSQL, JUnit 5, Mockito, Docker, GitHub Actions

- Built a task-management REST API with Spring Boot 3 and a layered architecture (controller, service, repository), DTOs, Bean Validation and global exception handling.
- Implemented stateless authentication with Spring Security and JWT (BCrypt), and persistence with Spring Data JPA / Hibernate on PostgreSQL, with pagination, filtering and per-user data access.
- Wrote 29 tests (JUnit 5, Mockito, MockMvc, @DataJpaTest) with JaCoCo, plus GitHub Actions CI/CD that builds, tests and packages the Docker image; documented with OpenAPI / Swagger and Postman.

Digital Document Signing Application

Individual project, E-Government course (UPO) · Feb 2025 – Jun 2025, improved Oct 2026 · Repository

Java EE (Servlets, JSP), Maven, Tomcat, iText 7, Viafirma REST API, JUnit 5, GitHub Actions

- Built a Java EE web application that authenticates users with their X.509 digital certificate and signs documents by consuming the Viafirma REST API.
- Implemented PAdES-B PDF signing (iText 7) with a QR stamp, client- and server-side. In 2026, with AI assistance, added JUnit 5 tests and CI on Java 11 and 17.

UrbanField · Sports Facility Booking Platform

Individual project, Technology Integration course (UPO) · Oct 2025 – Mar 2026, improved Oct 2026 · Repository

Python, Django 5.2, Django REST Framework, PostgreSQL, Docker Compose, Nginx, Gunicorn, GitHub Actions

- Built the full application: event management with readable URLs, search, user profiles and a REST API with public reads and authenticated writes.
- Integrated the Open-Meteo API with error handling and a timeout, and deployed with Docker Compose (Django, PostgreSQL, Nginx) and Gunicorn.
- In 2026, with AI-assisted development, added 32 tests (96% coverage) and CI, which uncovered and fixed two bugs.

OTHER PROJECTS

- **Auth API** (FastAPI, SQLAlchemy, JWT, bcrypt): sign-up, login and token refresh with single session and login rate limiting; 22 tests.
- **DevOps Toolkit** + live dashboard (FastAPI, React): 4-stage CI/CD pipeline and 100% coverage.

TECHNICAL SKILLS

- **Java:** Java 17, object-oriented programming (OOP), Spring Boot 3, Spring Security, Spring Data JPA, Hibernate, Bean Validation, Maven, JUnit 5, Mockito, MockMvc, Java EE (Servlets, JSP), Tomcat, collections, concurrency
- **Python:** Django, Django REST Framework, FastAPI, SQLAlchemy, pandas, Pytest · **Other languages:** SQL, JavaScript, TypeScript, C
- **Backend & APIs:** REST APIs, web services, JSON, JWT authentication, layered architecture, DTOs, MVC/MVT, OpenAPI / Swagger, Postman, third-party API integration
- **Databases:** SQL, relational databases (PostgreSQL, SQLite, H2), data modelling, indexing, ORM (JPA, SQLAlchemy)
- **DevOps & quality:** unit and integration testing, code coverage (JaCoCo), CI/CD (GitHub Actions), Docker, Docker Compose, Nginx, Linux, Git and GitHub (pull requests)
- **Methodologies:** Agile/Scrum, SOLID principles, design patterns (Factory Method, Strategy, Observer), Clean Code, technical documentation
- **Other:** AI-assisted development (Claude Code) with critical review · React, HTML/CSS · X.509, PAdES signatures, bcrypt

LANGUAGES & INTERESTS

Spanish: native · **English:** B2 (Upper-Intermediate)

Interests: home hardware lab (physical security and RFID/NFC, drones, 3D printing).
